

We're Here When You Need Us

Kansas City Screw Products, Inc. has successfully been in business since 1943. The company has made and continues to make major capital improvements in equipment and facilities. The majority of our key technicians have been with the company form more than ten years.

One-Stop Source Eliminates Anxiety

Often Customers ask us to make cost effective suggestions in the production of a certain component. We are happy to review plans, and make suggestions. We can work from drawings, or samples.

Count On Us for All Your Needs

When you need anything requiring screw machine production, CNC milling/lathe work, heat treatment or a combination of any of the preceding, Kansas City Screw Products, Inc. is the source you can always count on.

We would appreciate the opportunity to quote on your machining needs no matter how big or small.

We invite you to take a look at us via our website www.KCSP.com

KANSAS CITY SCREW PRODUCTS, INC.

*Customized Precision Part Machining
& Products*

Meeting your Machining Needs

We Offer You More than Our Name Implies

Although originally known as a "Screw Machine Products Manufacturer" our machining capabilities to CNC machining. We are able to precision turn (within .0001 tolerances) from your plans or parts, in all grades of aluminum, brass, stainless steel, alloys, and other engineered plastics.

Quantity Requests

Whether you need one part or thousands, we are able to accommodate you. When running large quantities, we can provide attractive volume discounts as well as specific delivery schedules from blanket purchase orders.

Prompt Delivery

We take pride in supplying our customers with quality machined parts, and prompt delivery. On large volume orders many customers request blanket purchase orders to phase payments in the most convenient manner, and to help keep their inventories at a minimum.

One Contract Responsibility

What ever you require in precision turning, CNC milling and lathe work, secondary finishing services, heat treating and plating can be handled under ONE CONTRACT with Kansas City Screw Products, Inc.

Manufactured Screw Machine Products

Producing precision screw machine products on both single, and multiple spindle machines ranging in size as small as 3/32ns to 2-1/4".

Our customer base includes OEMs such as, telecommunications, automobiles, conveyor components, environmental equipment and medical equipment, just to mention a few.

Quality Control Procedures

Our work is constantly checked for maximum quality and specification assurance. Precise records are kept, and certifications of compliance are provided when requested. Our facility is equipped with a wide assortment of inspection equipment. No order is set into production without having a 1st part inspection.

CNC Vertical Milling and CNC Lathe Work

Our CNC mills feature ultra high speed design. Thus, they are very efficient for machining small light alloy components for high tech equipment and products.

Our CNC Lathes have rigid beds for accurate, heavy-duty cutting. High speed indexing cuts down time loss.

In our production area at this time we have 4 CNC Machining Centers, and 6 CNC Lathes, to provide you with the most current machining capabilities and tolerance requests.

Secondary Services Available

Services such as deep hole drilling, milling, sanding and deburring are available in-house to keep production moving while holding costs to a minimum.
